Diabetes: Causes, Consequences and Cures?

The LSI Café Scientifique is where you can learn about the latest ideas and breakthroughs in life science research and technology in an informal setting. It's a place for group discussion about current topics. It's not a lecture! Audience involvement is important.

This session will feature members of the LSI Diabetes Research Group, who are studying both type 1 and type 2 diabetes. Come hear about the strategies to figure out what causes diabetes and what new treatments are being explored. Bring your ideas and questions!

Timothy Kieffer

Professor

Cellular & Physiological Sciences
University of British Columbia

Susanne Clee

Assistant Professor

Cellular & Physiological Sciences
University of British Columbia

Moderator: Roger Brownsey,

Professor & Head, Biochemistry and Molecular Biology
University of British Columbia
