

# Do you think an online system for the self-selection assistive technology for bathroom equipment may be helpful?

## PURPOSE OF THIS STUDY:

We would like to gather people's opinions and concerns about using an online system called *SmartAssist2* for the self-selection of assistive technology in the bathroom setting.

## WHO CAN PARTICIPATE?

- Adults 50 years old or older who may need bathroom equipment
- Assistive technology user, caregiver, health professional, manager, manufacturer, funding agency, or researcher
- Able to read and speak English

## WHAT IS INVOLVED?

You will participate in one or two sessions that ask you about your general technology use and where bathroom equipment may have been needed. You will then answer questions with a system called *SmartAssist2* (assisted by a caregiver or family member if needed) on a computer provided by us. You will also be asked to give feedback on each part of *SmartAssist2* and share your experiences through a questionnaire.

Any information you provide will remain completely confidential.

## CONTACT INFORMATION:

Leena Chau, Research Coordinator  
Phone: 604. 714.4108  
Email: [leena.chau@ubc.ca](mailto:leena.chau@ubc.ca)

## STUDY TIME/DURATION

We will be looking for participants immediately and the study will end in August 2019.

## STUDY LOCATION

In participants' homes and/or at GF Strong.
