

Exploring perceptions of artificial intelligence in medicine

PURPOSE OF THIS STUDY

The purpose of this study is to explore physicians' perceptions of artificial intelligence (AI) in health care, focusing on how views differ across career stages and specialties. It will examine the impact of generational differences and clinical experience on AI adoption. Additionally, the research will investigate how physicians anticipate their roles evolving as AI automates aspects of medical practice. By analyzing these dimensions, the study aims to provide a nuanced understanding of the medical community's readiness for AI integration and its implications for clinical workflow.

WHO CAN PARTICIPATE

This study is open to VCH physicians.

WHAT IS INVOLVED

Participation involves a survey on REDCap that will take approximately 10 to 15 minutes to complete.

CONTACT INFORMATION

Vivian Wu, Medical Student
Phone: 604-636-8004
