

Are you a researcher, clinician, or healthcare decision-maker who uses PREMs and PROMs data?

Researchers and others interested in incorporating patient assessments of experiences and outcomes into research are invited to participate in workshops across BC to gather input on priorities for advancing the science of patient-centred measurement methods. Themes from the workshops will inform a call for research proposals with funding from the BC SUPPORT Unit's Patient-Centred Measurement Methods Cluster.

The Vancouver Coastal Health Stakeholder Workshop will be held in Vancouver, from 10am-12pm on the 7th of December.

Using the Patient's Experience to Transform Healthcare.

Interested in participating ?
