

VCHRI SPARKS Research Project Summary

1. Scientific Summary (4500-character limit)

Provide a scientific summary of the proposed project suitable for a researcher outside your field. The summary should include background information, a research question/hypothesis, specific aims and relevant methodology, the significance of the work and the feasibility of completing the project in the time available.

2. Training Expectation (3000-character limit)

Describe the student's specific role(s) in the research project including the specific tasks to be performed and instruction/mentorship to be provided.

A large, empty rectangular box with a thin black border, intended for the student to write their response to the training expectation question. The box occupies most of the lower half of the page.

3. Project Relevance (3000-character limit)

Describe how the proposed research has direct relevance to improving health outcomes, patient experience, and/or service delivery at VCH. Applications that do not adequately demonstrate the project relevance will be ineligible for funding.
